WORK EXPERIENCE

Programmer - CTrends Software and Services Ltd

December 2025 - March 2026

I was involved in data-mining tasks, including web-scraping and data-cleaning, using Python. I also researched different PostgreSQL extensions such as PGML, PGAI, and other AI tools, and created documentation from my research based on the needs of the company.

Intern - Walton Hi-Tech Industries PLC

October 2025 - November 2025

I spent one month at Walton as a Backend Engineer. I was involved in designing requisition software, and contributed to the ER-Model, ER-Diagram, Software Requirements Specifications, etc. Once a preliminary design had been accomplished, I then took part in developing CRUD APIs for the database entities using Spring Boot and PostgreSQL.

LATEST PROJECTS

The Footnote

thefootnote.net

Collaborated with a team of developers to build a responsive and accessible news platform using NextJS and Tailwind CSS. I developed the landing page according to the design provided by the client, and made it responsive for all screen sizes.

UnBiased

github.com/areebuzair/UnBiased

A react-web app with a springboot server that uses AI to verify news articles and rumours. The springboot server makes HTTP requests to external API services to fetch the news and to invoke LLM responses. We used caffeine for caching and Firebase for user authentication.

EDUCATION

2022 - 2026	BSc (CSE) at Islamic University of Technology, Gazipur	CGPA: 3.87/4.0
2021	HSC at Notre Dame College, Dhaka	GPA: 5.0/5.0
2019	SSC at Bangladesh International School and College, Mohakhali	GPA: 5.0/5.0

SKILLS

Languages	JavaScript (NodeJS), Python, Java
Frameworks & Libraries	ReactJS, NextJS, Tailwind CSS, Spring Boot
Version Control	Git, GitHub
